SmartMatch

AI-Powered Room Matching

Logo: Smart Match

Smart Match offers all-in-one comparison view, cleaner results, faster decisions, accuracy, and smart defaults & visual intelligence.

RezLive.com, a global B2B travel distribution platform, has announced the official launch of Smart Match, an AI-powered feature designed to group, compare, and present hotel room options in a consolidated view, transforming the room selection experience.

Jaal Shah, Founder of RezLive.com and Group Managing Director at Travel Designer Group, said, “Our mission has always been to empower travel agents with smart tools that save time, reduce booking errors, and enhance their overall experience. With Smart Match, we’re offering intelligent decision-making at scale—blending technology with trust.”

Key Benefits of Smart Match include, compare room types, board inclusions, and prices in a single snapshot; consolidates similar room options for streamlined selection; eliminates irrelevant or duplicate listings; considers cancellation policies, price breakdowns, and room configurations; and highlights top-value options based on preferences and booking behaviour.
